### Notes and Definitions

Regulatory Compliance samples were collected onsite at facility according to ORELAP-SOP-001 and ORELAP-SOP-002 and following Sampling Plan FN117. Quality Control samples were tested as received. Results do not include uncertainty of measurements. Available upon request.

|     |                                                                                                                                            |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------|
| ATM | Non-cannabis matrix related interference or suppression of Internal standard                                                               |
| BLI | Baseline Interference - Cannabinoid peak interference in chromatographic baseline affecting QC recovery .                                  |
| BLK | Analyte detected in method blank, but not associated samples.                                                                              |
| BSH | Blank Spike High - Blank Spike recovery above method limit. no detections in samples.                                                      |
| BSL | Blank Spike Low - Blank Spike recovery below lower method limit, analyte chromatography reviewed manually for all samples.                 |
| C   | Interference due to co-elution                                                                                                             |
| CBD | CBD matrix interference on GC Pest chromatography                                                                                          |
| CV1 | CCV was above acceptance criteria, Non-detect samples are considered acceptable.                                                           |
| CV2 | CCV was below acceptance criteria, sample still exceeds regulatory limit.                                                                  |
| INF | One or more QC falls outside acceptance criteria. Data entered into LIMS for informational purposes only.                                  |
| ISH | Internal Standard concentration is above acceptance criteria.                                                                              |
| ISL | Internal Standard concentration is below acceptance criteria.                                                                              |
| MSH | Matrix Spike High - Matrix Spike recovery above method limits.                                                                             |
| MSI | Matrix Spike Interference - Matrix spike source sample contains analyte hit above calibration affecting recovery accuracy in Matrix Spike. |
| MSL | Matrix Spike Low - Matrix Spike recovery below lower method limit, analyte chromatography reviewed manually for all samples.               |
| TPP | Internal Standard concentration outside control limit due to matrix interference                                                           |
| U   |                                                                                                                                            |
